

WOCA DENMARK OIL REFRESHER

A specialised vegetable based and emission free product.

You might want to use WOCA oil refresher to rejuvenate the floors protective coating after an incident or once or twice a year. This penetrating oil refresher will fill tiny gaps or scratches and harden to restore the woods protective coating.

CLEANING INSTRUCTIONS

- 1) Vacuum or Sweep the wooden floor.
- 2) Put 5 litres of warm water into a bucket or container.
- 3) Shake the bottle before use.
- 4) Add 250ml of OIL REFRESHER into the water.
- 5) Using a micro fibre mop, that has been dipped into the water then wrung, so it is not too wet. Wipe the floor.

TIP: Don't walk on floor for 20-60 min, so product can harden to re-establish the protective film on your floors.
